## 10 CFR 851 CHPRC Worker Safety and Health Program Description

Revision 3, Change 4

Published: 12/08/2020  
Effective: 12/08/2020

Program: Occupational Safety and Industrial Hygiene  
Topic: Occupational Safety and Industrial Health

Technical Authority: Robinson, Roby  
Alternate Technical Authority: Holshue, Kenneth  
Functional Manager: Knutson, Garrett

## Use Type: Administrative

- Central Plateau Surveillance and Maintenance :  
**Categorical Exclusion:** GCX-7 (Minor Change)  
**Screener:** Waller, Mitchell
- 100 K Facility :  
**Categorical Exclusion:** GCX-7 (Minor Change)  
**Screener:** Oberg, Brian
- Canister Storage Building/Interim Storage Area :  
**Categorical Exclusion:** GCX-7 (Minor Change)  
**Screener:** Garrett, Robert
- Plutonium Finishing Plant :  
**Categorical Exclusion:** GCX-7 (Minor Change)  
**Screener:** Enghusen, Mark
- Solid Waste Operations Complex :  
**Categorical Exclusion:** GCX-7 (Minor Change)  
**Screener:** Jacobs, Orvil
- Transportation :  
Excluded from USQ  
**Exclusion Reason:**  
N/A per Section 1.3.
- Waste Encapsulation Storage Facility :  
**Categorical Exclusion:** GCX-7 (Minor Change)  
**Screener:** Garrett, Robert
- 324 Facility :  
**Categorical Exclusion:** GCX-7 (Minor Change)  
**Screener:** Waller, Mitchell
- PFP Ancillary Structures :  
**Categorical Exclusion:** GCX-7 (Minor Change)  
**Screener:** Hicks, Jarrod

**JHA:** Administrative

**Periodic Review Due Date:**04/18/2022

## 10 CFR 851 CHPRC Worker Safety and Health Program Description

Published Date: 12/08/20

Effective Date: 12/08/20

### 1.0 EXECUTIVE SUMMARY

The *10 CFR 851 CHPRC Worker Safety and Health Program Description* (this document) identifies the elements, methods, and processes by which CH2M HILL Plateau Remediation Company (CHPRC) meets the requirements in the Title 10, *Energy, Code of Federal Regulations* (CFR) Part 851, *Worker Safety and Health Program* (Rule) published in the Federal Register Volume 71 No 27, February 9, 2006. The Rule codifies worker protection program requirements and establishes the following:

- Requirements for a worker safety and health program that will reduce or prevent occupational injuries, illnesses, and accidental losses by requiring U.S. Department of Energy (DOE) contractors to provide their employees with safe and healthy workplaces at DOE sites; and
- Procedures for investigating whether a violation of a requirement of the Rule has occurred, for determining the nature and extent of any violation, and for imposing an appropriate remedy (851.1).

In accordance with Subpart C of the Rule, CHPRC is responsible for the safety and health of CHPRC workforce (851.20), including CHPRC employees and contractors, that meet the scope and definition of “*work at a DOE site in furtherance of the DOE mission*,” as defined in 10 CFR 851.3. CHPRC’s accountability to adhere to the Rule’s referenced requirements is based on the Rule’s Preamble, Federal Register Volume 71 No 27, February 9, 2006, page 6896 (Column 1), which states: “The standards included in this final rule are consistent with those mandated under DOE Order 440.1A.”

CHPRC has adopted other best management practices, consensus standards, and health-based values not invoked by the Rule. CHPRC is contractually obligated to encourage employees to decline to perform a task that “poses an imminent risk of death or serious physical harm...” [(851.20(b)(8))]; however, CHPRC joined the rest of the Hanford Site contractors by using a graded approach that provides workers the right to Stop Work when they feel the hazard has not been fully addressed.

CHPRC had established several memoranda of agreement (MOA) with other Hanford Site contractors who have a key role in CHPRC’s ability to meet the Rule. This meets the 851.11(a)(2)(ii) requirement to coordinate to ensure there are clear roles, responsibilities, and procedures to ensure the safety and health of workers at multi-contractor workplaces.

CHPRC has an approved Integrated Safety Management System/Environmental Management System (ISMS/EMS), PRC-MP-MS-003, *Integrated Safety Management System/Environmental Management System Description (ISMSD)*, which describes how environment, safety, health, and quality integrate into the work planning and execution for CHPRC’s scope of work.

### 2.0 BACKGROUND

On October 1, 2008, CHPRC began managing the Plateau Remediation Contract (DE-AC06-08RL14788) for the U.S. Department of Energy Richland Operations Office (DOE-RL). The contracted activity occurs at the Hanford Site, located near Richland, Washington, a covered workplace under 10 CFR 851.3, “a place at a DOE site where a contractor is responsible for performing work in furtherance of a DOE mission.” This document is consistent with and supports PRC-MP-MS-003.

## 10 CFR 851 CHPRC Worker Safety and Health Program Description

Published Date: 12/08/20

Effective Date: 12/08/20

CHPRC completed contract deliverable C.3.2.3-1, *Adopted Worker Safety and Health Program* via letter CHPRC-0800013, Revision 2 on August 28, 2008. This deliverable adopted the Fluor Hanford, Inc. HNF-MP-32219, *10 CFR 851 PHMC Worker Safety and Health Program Description*, Revision 3 in its entirety, including referenced documents. The Richland Operations Office responded with the letter, "APPROVAL OF THE 10 CFR 851 WORKER SAFETY AND HEALTH PROGRAM," 08-SED-0208, dated September 23, 2008. This confirmed CHPRC compliance with the 851.11(b)(1), which states: "... no work may be performed at a covered workplace unless an approved worker safety and health program is in place for the workforce."

### 3.0 ROLES AND RESPONSIBILITIES

#### 3.1 General Description

The CHPRC Safety, Health, Security, and Quality (SHS&Q) support services organization is responsible for maintaining this CHPRC Worker Safety and Health Program Description (WSHPD). Within SHS&Q, Occupational Safety and Industrial Hygiene (OS&IH) is responsible for program development, implementation, and oversight. Price Anderson Amendments Act (PAAA) Event & Reporting is responsible for performing the actions associated with the PAAA program described in PRC-PRO-NS-2243, *Identification, Reporting, and Tracking of Nuclear Safety and Worker Safety and Health Requirement Noncompliances & PAAA/Worker Safety and Health Enforcement Activities*. Appendix A, "Description of Functional Areas," provides a summary description of CHPRC organizations responsible for implementation of specific areas of the Rule. CHPRC Projects and organizations are responsible for implementing the overall worker safety and health program and appropriate integration into contracting and work planning activities.

The roles and responsibilities of organizations and personnel supporting CHPRC are described in PRC-MP-MS-003. CHPRC establishes specific roles and responsibilities for implementation of worker safety and health requirements through the document format established in the CHPRC documents identified in Appendix B, "851 Implementation Matrix," which defines specific responsibilities for implementation of the scope of the individual document. Appendix C, "Contractor Safety and Health," provides a summary of the processes used to ensure CHPRC contracted work scope is performed in accordance with the WSHPD.

#### 3.2 Integration of Site Activities

The Hanford Site consists of three DOE Field Offices and multiple contractors, requiring integration of some worker health and safety activities. CHPRC supports the Site Wide Standards Management Plan and provides qualified resources to represent CHPRC interests on a continuing basis. Occasionally, CHPRC meets with other site contractors to address site wide issues in order to provide a consistent approach to resolutions.

Work performed by/for other contractors at the Hanford Site is controlled under a series of MOAs. Two MOAs are in place for the DOE-Prime Contractors who have a key role in CHPRC's ability to meet all the Rule's requirements.

- Mission Support Alliance, LLC, (MSA)
- Occupational Medical Service Provider (OMSP)

In general, for work authorized under the MOAs, safety will be controlled by the contractor in control of the work location.

## 10 CFR 851 CHPRC Worker Safety and Health Program Description

Published Date: 12/08/20

Effective Date: 12/08/20

When obtaining products or services from other Hanford Site DOE Prime Contractors through the Work Authorization fund transfers, the expectation is that DOE has approved top-level programs in health, safety, and quality (ISMS, Worker Safety and Health Program [WSHP], and Quality Assurance Program), and that these programs and documents are found acceptable to DOE and no further verification is required.

### 3.3 Worker Safety and Health Program Maintenance

The CHPRC SHS&Q Vice President is accountable for maintaining the WSHPD and shall approve all revisions. The WSHPD will be maintained in accordance with the Rule. An annual review will be conducted, at a minimum, to verify that the WSHP adequately reflects operations and controls. The annual review will include worker participation as defined in 851.11(d).

The WSHPD will be maintained under CHPRC configuration control and submitted for review and approval whenever a significant change or addition to the WSHP is made, when minor revisions are required, or annually.

Applicable labor organizations will be notified of any updates or changes to the program as defined in 851.11(d). This communication is initiated through Labor Relations to the Labor Organization President(s). Changes to the program are communicated to the workforce through a variety of methods (e.g., Safety Tailgate slides and the Plateau Remediation Contract Procedure System [PPS] notifications).

#### 3.3.1 Minor Revisions

Editorial or minor process improvements that do not change context or concept will be reviewed, approved, and incorporated to the WSHPD without DOE-RL approval. Reference to these changes/revisions will be identified and communicated to the DOE-RL during the annual WSHPD review process.

#### 3.3.2 Major Revisions

Significant operational changes and/or issues having an impact upon approved safety and health thresholds require written DOE-RL Contracting Officer approval prior to implementation, such as:

- New contractor awarded contract,
- Contractor accepts a new work scope for a new toxic, reactive, flammable, or explosive chemical which was not addressed in the approved WSHP,
- The toxicity or explosive hazard, such as chemical storage, has increased where there is a credible accident scenario that would have an impact upon the co-located workers or off-site public, or
- A site not currently using explosives begins a project involving explosives.

#### 3.3.3 Annual Review

In accordance with contractual requirements, submit an updated WSHPD for approval or letter stating that no changes are necessary to the currently approved plan.

## 10 CFR 851 CHPRC Worker Safety and Health Program Description

Published Date: 12/08/20

Effective Date: 12/08/20

### 3.4 Submittals under 10 CFR 851

The CHPRC SHS&Q support services organization is responsible for maintaining the CHPRC WSHPD and submittals/notifications under the Rule. The following submittals/notifications are defined in the Rule, and will be provided to DOE-RL.

#### 3.4.1 Annual Worker Safety and Health Program Description

In accordance with contractual requirements, the WSHPD will be reviewed and submitted for DOE-RL Contracting Officer approval annually (12 months after the preceding revision date).

#### 3.4.2 Closure Facility Hazards

In accordance with 851.21(b), CHPRC will submit to DOE-RL a list of closure facility hazards and the established controls within 90 days after identifying such hazards. Closure facility hazards are defined in 851.3, and are limited to hazards in which means of control involve deviations from the technical requirements of 851.23 and would require costly and extensive structural/engineering modifications to be in compliance.

#### 3.4.3 Requests for Interpretative Ruling

The DOE Office of General Counsel is the sole authority that can provide binding interpretations of the Rule. The DOE Office of Health, Safety & Security can provide technical information on implementation and enforcement guidance. CHPRC will provide courtesy notification to DOE-RL of any requests for interpretation.

#### 3.4.4 Requests for Variance

The Rule's Subpart D defines the process for requesting a variance, and will be used when requesting temporary, permanent, and national defense variances. CHPRC will inform DOE-RL of the need for a variance and submit the request for variance to the Cognizant Secretarial Officer.

#### 3.4.5 Self-Identification and Tracking System

CHPRC will use the DOE voluntary Noncompliance Tracking System (NTS) and the guidelines provided in the Enforcement Process Overview to report any noncompliance. CHPRC will use the existing Condition Reporting and Resolution System (CRRS) for non-NTS reportable 10 CFR 851 non-compliances.

### 4.0 PROGRAM DESCRIPTIONS

CHPRC has an established safety and health program based on CHPRC contract requirements and the Rule. The overall WSHP supports the functional areas established in the Rule and provides the environment for a place of employment that is free from recognized hazards that are causing or have the potential to cause death or serious physical harm to workers (851.10(a)). CHPRC has separate, non-regulatory commitments to worker ownership and partnership in safety and health, as defined in the 47 *Federal Register* (FR) 29025, *Voluntary Protection Programs (VPP)*.

**Appendix A - Descriptions of “Worker Safety and Health Functional Areas”**

(10 CFR 851 Appendix A)

The methods to ensure implementation of the Functional Areas are briefly summarized below. The Functional Areas strategy is based on guidance from DOE G 440.1-8, *Implementation Guide for use with 10 CFR PART 851, Worker Safety and Health Program*, and the DOE 851, *Frequently Asked Questions*, web site established by the Office of Environment, Safety & Health at: <https://www.energy.gov/ehss/downloads/10-cfr-851-worker-safety-and-health-program-frequently-asked-questions>

**1.0 CONSTRUCTION SAFETY**

**APPLICABLE.** CHPRC complies with the 10 CFR 851.23 mandated construction safety laws, codes, standards, and regulations relating to construction safety, and ensures that all reasonable steps are taken to set and communicate expectations and enforce requirements for subcontractor safety performance.

- Construction means combination of erection, installation, assembly, demolition, or fabrication activities involved to create a new facility or to alter, add to, rehabilitate, dismantle, or remove an existing facility. It also includes the alteration and repair (including dredging, excavating, and painting) of buildings, structures, or other real property, as well as any construction, demolition, and excavation activities conducted as part of environmental restoration or remediation efforts (10 CFR 851.3(a) - Definitions).
- Construction contractor means the lowest tiered contractor with primary responsibility for the execution of all construction work described within a construction procurement or authorization document (e.g., construction contract, work order). (10 CFR 851.3(a) Definitions).
- Construction contractor is responsible for identifying a designated representative on the worksite during periods of active construction, and assigning competent persons (where required by the Occupational Safety and Health Administration [OSHA]).
- Construction safety management and oversight ensures compliance with mandated codes and standards. Specific implementation methods are identified in Appendix B, *851 Implementation Matrix*.
- CHPRC work planning processes ensure that activities occurring in a non-construction environment trigger the appropriate construction standard requirements.

**2.0 FIRE PROTECTION**

**LIMITED APPLICABILITY.** A portion of this section does not apply to CHPRC, as the contract directs this government furnished service through another DOE-RL contracted organization. MSA's Hanford Fire Department (HFD) provides 10 CFR 851 related Fire Protection services. The HFD organization is broken into three divisions.

- **Operations Division** is responsible for fire suppression, hazardous materials response, emergency medical response, and special rescue support activities.

**10 CFR 851 CHPRC Worker Safety and Health Program Description**

Published Date: 12/08/20

Effective Date: 12/08/20

**Appendix A - (Cont.)**

- **Fire Systems Testing and Maintenance Division** is responsible for the functional testing, inspection and preventive and repair maintenance activities for Hanford Site fire alarm and suppression systems to meet National Fire Protection Association (NFPA) and DOE standards and requirements. In addition, this element performs annual inspection of site fire extinguishers, provides emergency response backup for suppression, ambulance, and hazardous materials response support, and maintains all firefighter training certifications.
- The **Fire Prevention Division** is managed by the Hanford Site Fire Marshal and is responsible for all fire prevention activities, including the building tour and inspection program.

CHPRC maintains a staff of Fire Protection Engineers to ensure the design and maintenance of fire protection systems meet the Rule's requirements. Specific implementation methods are identified in Appendix B, "851 Implementation Matrix."

**3.0 EXPLOSIVES SAFETY**

APPLICABLE. CHPRC complies with 851.23 mandated Explosives Safety laws, codes, standards, and regulations relating to explosives safety. CHPRC Projects activities infrequently use explosives as part of well decommissioning, demolition activities, and construction activities. All acquisition, storage, and use of explosives are in accordance with MSA's HFD and Safeguard & Security processes. Specific implementation methods are identified in Appendix B, "851 Implementation Matrix."

**4.0 PRESSURE SAFETY**

APPLICABLE. CHPRC complies with 851.23 mandated safety and health laws, codes, standards, and regulations relating to maintenance and operation of pressure vessels. The DOE-RL is designated as the "jurisdictional authority" for Pressure Vessels. The Jurisdictional Authority interpretations are to be kept on file. Any variances or exemptions pursued in the future that are beyond the Jurisdictional Authority's scope and authority, as defined in American Society of Mechanical Engineers (ASME) Boiler Pressure Code series, will be pursued through CHPRC Prime Contracts and managed as exemptions or variances to DOE requirements. Specific implementation methods are identified in Appendix B, "851 Implementation Matrix."

**5.0 FIREARMS SAFETY**

NOT APPLICABLE. The CHPRC contracted work scope directs this government furnished service through another DOE-RL contracted organization. MSA's Security related Protective Forces, and Animal Control, provides services that require firearms.

**6.0 INDUSTRIAL HYGIENE**

APPLICABLE. CHPRC complies with 851.23 contractually mandated safety and health laws, codes, and standards relating to industrial hygiene. Appendix B, "851 Implementation Matrix," identifies applicable requirements and implementation processes. CHPRC reviews for adoption more recent publications of the ACGIH TLVs when they are more protective.

**10 CFR 851 CHPRC Worker Safety and Health Program Description**

Published Date: 12/08/20

Effective Date: 12/08/20

**Appendix A - (Cont.)****7.0 BIOLOGICAL SAFETY**

NOT APPLICABLE. CHPRC contracted work scope does not include hazards requiring the formation of an Institutional Biosafety Committee or equivalent as defined in 10 CFR 851 Appendix A, Section 7.

**8.0 OCCUPATIONAL MEDICINE**

LIMITED APPLICABILITY. CHPRC obtains occupational medicine services as a government furnished service through another DOE-RL contracted organization and their subcontractors. At Hanford, the OMSP is responsible to establish an 851 Appendix A, subparagraph 8, compliant and comprehensive occupational medicine program for workers employed at CHPRC that work on a DOE site for more than 30 days in a 12-month period or are enrolled for any length of time in a required medical or exposure monitoring program.

All CHPRC employees, contractors and their lower tiered on-site subcontractors are to use the OMSP for medical services including medical examinations, first aid treatment, employee assistance program, and return to work evaluations. See Appendix C for further discussion. HFD provides ambulance service for urgent situations requiring care and transport.

CHPRC provides the OMSP access to hazard information by promoting adequate communication, coordination, and sharing among operating and safety organizations. CHPRC provides access to current information about actual or potential work-related hazards, employee job tasks, hazard analysis information, actual or potential worksite exposures, and employee essential job functions.

CHPRC provides the OMSP access to the workplace for evaluation of job conditions and issues relating to worker's health. CHPRC provides the opportunity and has established a forum for OMSP staff to participate in worker safety and health team meetings and committees. Workplace evaluations and meetings include the President's Zero Accident Council (PZAC), case management meetings, emergency preparedness planning, and project-specific wellness and injury reduction activities.

Under the OMSP's management, employee medical, psychological, and Employee Assistance Program (EAP), records are kept confidential and protected. Access to medical records is provided in accordance with DOE regulations implementing the Privacy Act and the *Energy Employees Occupational Illness Compensations Program Act*.

**9.0 MOTOR VEHICLE SAFETY**

APPLICABLE. CHPRC complies with 10 CFR 851.23 mandated occupational safety laws, codes, standards, and regulations relating to motor vehicle safety. Appendix B, "851 Implementation Matrix," identifies applicable requirements and implementation processes.

**10 CFR 851 CHPRC Worker Safety and Health Program Description**

Published Date: 12/08/20

Effective Date: 12/08/20

**Appendix A - (Cont.)****10.0 ELECTRICAL SAFETY**

APPLICABLE. CHPRC complies with 851.23 mandated safety laws, codes, standards, and regulations relating to maintenance and operation of an electrical safety program. CHPRC and DOE-RL have established a process within the CHPRC to identify an Authority Having Jurisdiction (AHJ) for the NFPA Electrical Standards, NFPA-70, *National Electric Code*, for design and installation; and an AHJ for NFPA-70E, *Standard for Electrical Safety in the Workplace*, electrical safe work practices. Both AHJ have authority for interpretations and equivalencies in regards to the NFPA-70 and the NFPA-70E. The AHJ is identified to DOE-RL outside of the WSHP under a separate letter. Interpretations for safe electrical design and installation are kept by the Hanford Electrical Codes Board. Board interpretations for safe electrical work practices are kept by the Hanford Workplace Electrical Safety Board. Any variances or exemptions pursued in the future that are beyond the AHJ's scope and authority, as defined in National Electrical Code (NEC) or other NFPA documents, will be pursued through CHPRC Prime Contracts and managed as exemptions or variances to DOE requirements. Specific implementation methods are identified in Appendix B, "851 Implementation Matrix."

**11.0 NANOTECHNOLOGY SAFETY (RESERVED)**

No information is provided as the Rule has "Reserved" this section for future use.

**12.0 WORKPLACE VIOLENCE PREVENTION (RESERVED)**

No information is provided as the Rule has "Reserved" this section for future use.

Effective Date: 12/08/20

**Appendix C - Contractor Safety and Health**

The 10 CFR 851, *CHPRC Worker Safety and Health Program Description*, covers CHPRC contracted work scope at any tier based upon the nature and duration of the work performed.

10 CFR 851, the Rule, applies to all construction work and services such as consultant, professional services, staff augmentation, etc. that is in the furtherance of the DOE mission.

10 CFR 851 does not apply to vendors or suppliers coming into CHPRC workspaces who do not have service contracts and who engage in no more than incidental work related to delivery, installation or repair of the products provided.

10 CFR 851 occupational medicine requirements apply to CHPRC contracted work scope at any tier if they are conducting CHPRC work scope on the Hanford Site.

CHPRC uses standard terms and conditions to flow down the applicable requirements of the CHPRC Worker Safety and Health Program. These requirements are specifically embedded in the SP-5 *On Site Services* and PRC-PRO-AC-40471, *Contract Labor Resources*, Section 3.0 and 6.0. These terms and conditions reflect requirements consistent with the Rule, Subpart C. The standard terms and conditions are contractually binding and delineate corporate and personnel safety roles and responsibilities of CHPRC contractor at all tiers.

CHPRC has processes and procedures to screen contract Request for Proposal submittals to evaluate safety attributes (i.e., injury rates, Workers Compensation Experience Modification Rate, and OSHA Inspection history) and ensure the hazards associated with the contracted activity are properly addressed and meet the Rule's requirements. Depending on the scope of work and its complexity, offerors may be required to submit a safety plan for a specific hazard or activity, which will then be reviewed and approved as part of the contracting process.

CHPRC monitors the winning offeror's compliance with the worker safety and health program through routine safety inspections and reporting and tracking systems for non-compliance issues. These processes include contractor and contractor employee involvement. Safety and health non-compliance issues that cannot be immediately corrected are placed in a safe configuration until the issues can be resolved and corrective actions implemented.
